DETAILED ACTION

This is the first action on the merits. Claims 1-18 are pending. The preliminary amendment of 7/26/06 has been entered.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS(s), filed 7/26/06; 11/5/07, has/have been considered in full.

Oath/Declaration

3. The Oath/Declaration is acceptable.

Drawings

4. The drawings were received on 7/26/06. These drawings are accepted.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3656

7. Claims 5, 6, 14, 15, 16, 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim. "wide range of uses" and various kinds of signal lines" are unbounded.

Throughout the claims there is language which is vague and indefinite. Applicant must review the claims in their entirety for compliance under this section. The following are examples:

Claim 1, 8, it is not clear how selecting a connection changes the route. See the other independent claims as well.

Claims 2 and 3, are not further limiting (35 USC 112, 4th paragraph) since originally only one was claimed. It is then improper and not limiting since it is impossible to first claim one then claim many.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hezel Zimmer (5,437,207).

Zimmer shows the claimed invention where a robot (figure 2) has two wire bundles (12, 13) which follow different paths through the robot (wires going to 8', 8''); external

connections (11) which connect the lines to different external devices to control the operation of the robot.
